

# Double Face Grinding & Flat Honing

with Swiss Master VIT CBN & VIT DIA grinding tools

The main advantages of vitrified grinding tools are superior cutting power with low grinding pressure, resulting in short cycle times and excellent workpiece geometry

Our manufacturing expertise guarantees homogeneity and dimensional accuracy of the pellets.

composite molded version to maintain drainage system

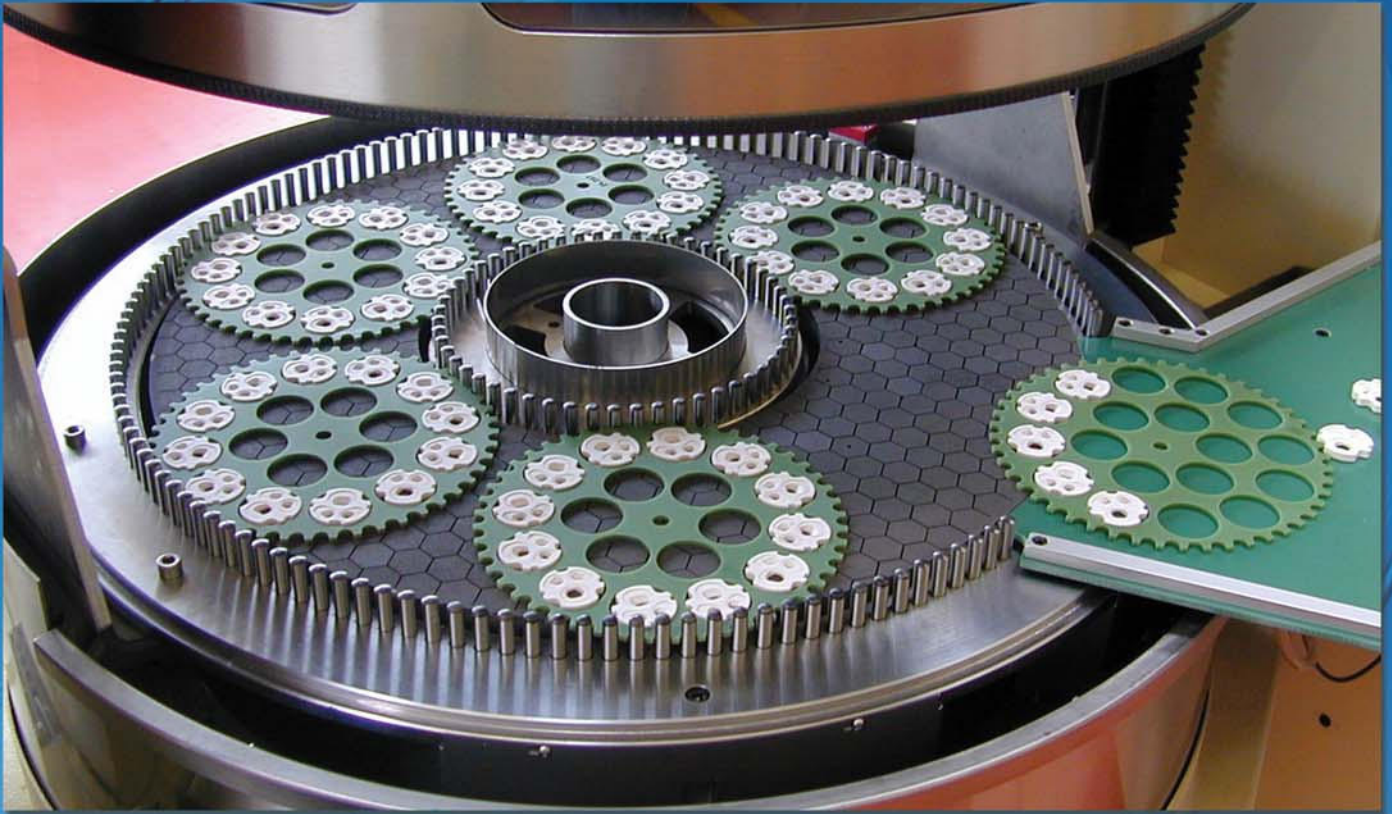

Goldfish Design pellets prevent breakages at the edge of the plate

with Swiss Master VIT CBN & VIT DIA grinding tools

## Applications:

- Sinter Metals
- Stainless Steels
- Heat treated steels

piston rings, connecting rods, cutting wheels, rings for roller bearing gears, gear pump rotors, stators, valve plates

- Fibre reinforced duro- and thermoplastics

seal rings, fuel pump rings and rotors, valve regulation plates, water mixing valve plates
